

BATTERY ENERGY STORAGE SYSTEM: DESIGNING & COMMISSIONING OF GRID-CONNECTED PHOTOVOLTAICS

OVERVIEW

The BESS technical training program is designed to equip professionals with the knowledge and skills required to design, install, operate, and maintain battery energy storage systems (BESS). The training provides a comprehensive understanding of BESS technology, its integration with renewable energy systems, and adherence to safety and regulatory standards.

OBJECTIVE

At the end of this course, the participants will be able to: -

- Ensure Safety in BESS: Handle and store systems safely, follow fire safety protocols, comply with regulations, and maintain systems effectively.
- Demonstrate Technical Proficiency: Showcase knowledge of technical specifications and ensure compatibility between GCPV components and BESS.
- Design and Size Systems: Develop and design efficient GCPV systems with BESS. Apply proper sizing techniques for both PV arrays and battery storage to meet specific energy demands.

REGISTRATION

COURSE INFORMATION

Date | 15 -17 April 2025

Time | 9am - 5pm

Course Fee

- RM3,780.00/pax (Non-MPIA members)
- RM 2,970.00/pax (MPIA members)

Venue | SHRDC, Shah Alam

Duration | 3 Days

Facilitators | Dr Sulaiman Shaari
Dr Ahmad Maliki Omar
Mustafa Kamal
Lim Chai Seng

TRAINING METHODOLOGY

Experiential learning, hands-on, structured activities

TARGET AUDIENCE

- Electrical Engineers and Technicians
- Renewable Energy Professionals
- Project Managers
- Utility Company Staff
